

# Transparent pricing

From day one, Invitae's mission has been to make medical-grade genetic testing accessible to everyone. Our guiding principles keep us focused on what's important: making genetic testing accessible.

Invitae's patient self-pay pricing in APAC is as follows:

Hereditary oncology (germline) diagnostic testing: \$299 USD

Proactive cancer or cardiology screening: \$299 USD

When ordered with carrier: \$125 USD

Cardiology, neurology, paediatric, rare disease diagnostic testing: \$349 USD

Proactive genetic health screening: \$399 USD

When ordered with carrier: \$175 USD

Carrier screening: \$299 USD  
Carrier partner: \$225 USD

Exome Proband only: \$1250 USD

Exome Duo/Trio: \$2500 USD

Non-invasive prenatal screening (NIPS):  
Core (singleton or twin): \$225 USD  
Expanded (singleton only): \$425 USD

Pharmacogenomics: \$250 USD

*For other tests, please reach out to your regional manager.*

## Invitae advantage

- **Hands-on support:** Invitae's team of genetic counsellors and genetics experts are available to discuss patient cases, provide result-specific insights, and even talk with your patients directly.
- **Comprehensive, customisable tests:** Ability to design and customise your own panels from an extensive range of expert-curated options.
- **Fast time to answers:** Results are available on average 14 days from sample receipt for most tests (faster for STAT cancer panels, NIPS, and more).
- **Next steps:** Results come with information about potential next steps, including medical management guidelines.

**Questions?** Please reach out to your local Invitae representative to discuss patient pay pricing or if you're interested in setting up an institutional contract. Find local contact information at [www.invitae.com/contact](http://www.invitae.com/contact). Thank you for partnering with Invitae as we work together to build the future of healthcare.
